## Keys don't float -

# Everything that you need to know about flying floats!

by

*Bryan Pill*

In this talk you will learn “**all you ever need to know about flying floats**” - well perhaps not but this will be an informative and entertaining evening for aviator and non-aviator alike and on the way you will understand the difference between a float plane and a flying boat! **Bryan** is a qualified FAA **float plane instructor**.

**Bryan** follows on from the last lecture he gave AirACES four years ago on operational bush flying, looking briefly at the **history of water aviation**, and the way **MAF have used them in their work**. He will explain why keys don't float and a few other gems, drawing on his experience operating a **straight float Cessna 185** on **Lake Victoria** in Uganda and the **Turbine Amphibious Beaver** in **Bangladesh** as well his training flying a **Maule** and **185** in the **USA** and **Canada**.

The talk will be fully illustrated with experiences from Bryan's career.

*All welcome*
