‘The De Havilland Mosquito’

by

Rod Dean

Rod Dean will tell the story about ‘the Mosquito’, which had a very difficult start to its career, with many senior RAF people unconvinced of the promised performance and the structural integrity of a wooden aircraft.

Fortunately, within parts of the Air Ministry there was support, & despite setbacks, mainly from Lord Beaverbrook, the Mosquito (‘Mossie’), flew and decisively proved its critics wrong on all counts.

The Mosquito became one of the most successful and versatile aircraft of WW2, covering every possible requirement, from fighter, bomber, reconnaissance, night-fighter and trainer.

This talk by Rod Dean, will be an in-depth study of the development, construction and use of the outstanding De Havilland Mosquito.

Rod’s presentation will include video clips as well as many photos.

All welcome
