

Helpful Notes on
SDNP Planning Public Access System
2017

The planning link on our webpage takes you directly to the South Downs National Park Public Access System for most things concerning planning applications in Lurgashall since April 2012 when 12mths after SDNP became the planning authority they were hosting their own system. For historic applications & decisions you should still search Chichester District Council Planning Portal.

You will arrive at the simple search. If you know the planning reference (or even part of it) then input this and the search should find the application.

Alternatively on arriving at the SDNP portal select the Advanced Search from the Search drop down menu and you can select a range of additional options. Most useful may be to select Parish = Lurgashall plus select a date range that interests you. If you know the postcode then you can enter that (be careful as not all applications have a postcode – particularly agricultural ones).

Want to search via an interactive map ? Then select the Search drop down and look for Planning > Map Search. You have to zoom in quite close before the applications will show on the map. Enable and use the Legend & Filter box to filter display to recent applications.
